

Scope of the Seminar:

Communication is one of the fundamental elements of the business. Customers, partners, remote employees are exactly the people you should be able to stay in touch with in 24/7 mode. The means to support remote team collaboration enable the scale of the existing enterprises to be increased, in particular, open new branches, find new clients, expand its sphere of activity (both within the country and abroad).

A few years ago, the functionality provided by the introduction of IP telephony was considered the top opportunity in the field of business communications. Today high technologies have moved so far that the interlocutors located in hundreds of thousands of kilometers can feel the true effect of presence. They can feel like sitting in the same room. In this article, you will find out which communication trends are leading for 2017-2018.
